WMS 3PL COLD STORAGE

The Ultimate Solution for Refrigerated Warehouses

Cold storage is a highly competitive business with sensitive products that need fast turnaround. The challenges of low temperature restriction in a warehouse makes tracking inventory become a more complicated task. Datex' long experience and success record with cold storage software solutions, gives us an edge in this market. We offer a system with advanced features developed specifically for refrigerated warehouses including the ability to track blast freezing fees, capture temperatures, and automate accessorial charges. These features, combined with our existing Warehouse Management System will guarantee a significant increase in revenue and in employee efficiency.

WMS 3PL cold storage Features:

- . IARW Compliant
- . Temperature Capturing
- . Lot Control
- . Blind and Bulk Blind Receiving
- . Accessorial Charges Capturing
- . Real-time Revenue Capturing
- . RF Putaway
- . Wave Creation
- . Pallet Tracking
- . Cycle counting and physical inventory
- . Pick and pack processing
- . Real-time inbound processing
- . Billing Payroll Processing
- . Deferred Handling Revenue Tracking
- . Available in Windows Mobile, Windows Pocket PC, and Windows CE

Results

- . Improved warehouse efficiency
- . Accurate location management
- . Exceptional reporting and data export capabilities
- . Improved customer visibility and increase optimization

Efficient Operations

Meeting customer demands in the 3PL refrigerated warehousing market depends heavily on the efficiency of its supply chain operations. Our Datex 3PL system for cold storage continues to improve the technology behind the inbound and outbound processes to take your business to a higher level.

- Capture accessorial charges on your RF handheld at any stage of the order process.
- Reduce time by selecting shipments based on various criteria to create a wave.
- Record temperatures at any stage of the order.
- Add flexibility to your picking process by creating single license plates or multiple license plates for all outbound shipments.
- Track the number of pallets that are on hand and how many have been received and shipped.
- Transfer material from several locations into a single location by using the Multi-stage Owner transfer feature.
- Integrate your existing applications directly into the Datex WMS 3PL Cold Storage.

Implementation:

Datex's professionals provide a variety of services for a successful implementation. With detailed requirements, definition processes, logistic analysis, solution designs, testing phases, and implementation, we ensure a smooth transition with minimal system interruptions and a quick return on investment.

Training & Support:

Training includes detailed manuals and accompanies all of Datex's software solutions. Training is also a part of every basic installation package, either on premises or at our headquarters in Clearwater, Florida. Datex offers support for all hardware and software solutions.

Choice of Mobile Devices:

Datex WMS 3PL gives you a choice of the latest and most advanced mobile devices and offers you the flexibility to integrate back-end applications.

Datex Corporation

Focused on empowering supply chain professionals, Datex Corporation is an international leader in logistics systems.
