

DATEX

FootPrint[®] **ORDER MANAGEMENT SYSTEM OMS**

Automation for Order Processing

Datex FootPrint[®] Order Management System is a real-time order control system that allows users to access company information from virtually anywhere using the internet. FootPrint[®] OMS incorporates order processing, inventory information, streamlining processes and improving accuracy. By providing information in real-time, orders are created based on actual inventory. Reduced errors, decreased labor costs and lowered capital tied to locked inventory are just a few of the fundamentals benefits of implementing the OMS system.

OMS Features:

- EDI Compatibility
- Vendor access on the Web
- Real-Time order entry
- Fully Integrated into WMS/IMS
- Real-Time status availability
- Inbound/Outbound Order tracking
- Vessel Tracking
- Robust Master File Setups
- Container Tracking
- Many-to-Many relationship between orders, shipments and containers.

FootPrint[®] OMS is provided as a stand alone system or as part of our Warehouse Management System. In both cases, the system streamlines the order management process, creating and maintaining information such as SKU's, vendors, customers, inbound orders, outbound orders and returns, as well as many other features. It provides a robust master file allowing companies to customize the data to their needs such as enabling those in the apparel industry to track different styles, colors and sizes.

Testimonial:

"Datex Supply Chain Management system has increased our efficiency and productivity."

Shelly Long, World Vision

Order Management System Flexibility:

- Full integration into your current business solutions
- Runs on Windows Platforms
- Handheld device compatibility- Windows CE and Windows Mobile
- Databases supported: SQL Server
- Available as Server/Client or Server/Client/Web Client
- Full Radio Frequency (RF) integration with all major hardware manufacturers

Datex Corporation

Datex is a leader in the development of software solutions designed to empower companies to increase visibility and mobility. We offer our customers tools which enable them to decrease logistics costs, increase productivity and become fierce competitors in their industries. Committed to setting the standard for excellence, we pride ourselves on the level of personal attention and assistance we offer our clients.
