

## **FootPrint<sup>®</sup>** **INVENTORY MANAGEMENT SYSTEM IMS**

The Ultimate Inventory Management Tool

Inventory management impacts every warehouse and distribution environment, presenting new challenges and requiring the use of the most current technology to remain competitive. Datex FootPrint<sup>®</sup> IMS real-time inventory control is a powerful tool and can be combined with Radio Frequency Identification (RFID) to keep your company in compliance with the latest industry standards. Real-time inventory control yields informed management decisions needed for increased efficiency and productivity.

### **Datex FootPrint<sup>®</sup> Basic Module**

- Order processing
- Inventory control
- Item/location bar-coding
- Real Time adjustments
- Receiving
- Detailed inventory reporting
- Theft protection
- Replenishment
- Cycle Counting

### **Inventory Attributes Supported and Tracked**

- Pallet ID/Container ID
- SKU
- Quantity
- Location
- Lot/Serial Number
- Hold & Activity Status
- Inbound order number
- Shipment number

### **Supported Operating Systems:**

- Windows XP/2000/NT
- Windows 95/98/ME
- Windows CE

### **Supported Databases**

- IBM DB2
- Microsoft Access
- Microsoft SQL Server

### **Testimonial:**

*"We no longer have to keep extra stock on hand with Datex Corporation's real-time Inventory Management solution."*

Ken Marshall, BASF

- **Inventory Reduction**

With real-time data collection, inventory accuracy will be dramatically improved, thus eliminating "buffer" stock and provide for better use of space through reduced inventories. Real-time bar-coded data collection will produce inventory accuracy to levels of 99.99%. Errors in writing, reading, and keying will be reduced, thus eliminating the need for taking physical inventory. Real-time information processing about materials/goods received will eliminate possibilities of unrecognized or batch delayed data information, thus reducing float dollars.

- **Reduced Keypunch and Verification Process DI Capabilities**

Real-time data collection will eliminate the need to keypunch any data and will reduce if not eliminate exception reports. Real-time receiving will eliminate the need to keypunch and verify receipt translations.

- **Reduction of Paperwork**

The transition to electronic data eliminates forms and paperwork procedures. Real-Time receiving eliminates the need for any paperwork to transfer data and the need for manual filling systems.

- **Improved Picking Productivity**

The addition of RF terminals and barcode labels will direct the driver to exact locations and abolish the need to spend 50% of the time searching for product. Eliminate "dead heading" and backtracking, by using sequence location picking procedures.

- **Maintenance Cost Reduction**

Better scheduling, routing and dispatching of lift trucks will be achieved with RF terminals, thus reducing lift truck operating costs.

- **Receiving Productivity**

RF terminals and clients provide instant access to open PO's or other records providing real-time information.

### Implementation:

Datex's professionals provide a variety of services for a successful implementation. With detailed requirements, definitions process, logistic analysis, solutions design, testing phase, and implementation, we ensure a smooth transition with minimal system interruptions and a quick return on investment.

### Training & Support:

Training includes detailed manuals and accompanies all of Datex's software solutions. Training is also a part of every basic installation package, either on premises or at our headquarters in Clearwater, Florida. Datex offers support for all hardware and software solutions.

## Datex Corporation

Datex is a leader in the development of software solutions designed to empower companies to increase visibility and mobility. We offer our customers tools which enable them to decrease logistics costs, increase productivity and become fierce competitors in their industries. Committed to setting the standard for excellence, we pride ourselves on the level of personal attention and assistance we offer our clients.
