

A Supply Chain

REVOLUTION

DATEX CORPORATION & SAGE SOFTWARE MAS 500

MAS 500 Enterprise Resource Planning

Manufacturing, warehousing, distribution, and supply chain fulfillment operations are facing new challenges to meet increasing customer demands. Companies are turning to business automation software to meet these demands and remain competitive. The MAS 500 ERP by Sage Software, is a powerful solution for Enterprise Resource Planning (ERP). If your company is experiencing increased transaction volume, disjointed business functions over budget sales or a plateau in sales, implementing the MAS 500 can streamline your efforts and help you achieve a customer satisfaction along with financial success.

MAS 500 Modules:

- Financials
- Fixed Asset Management
- Distribution
- Starship
- Manufacturing
- Project Accounting
- Time Sheet Professional

Solution:

Gain a powerful tool that allows you to synchronize the data to run the Datex EX Warehouse Management system.

Results:

Operating out of sight, the MAS 500 program transports ERP static data to Datex WMS and the resultant information back into ERP.

Testimonial:

"The Datex Corporation Professional Services Division is exceptional and offers the most comprehensive customer service that I have seen in logistics."

Tom Shock, 180s
