3PL Warehouse Management *Software*
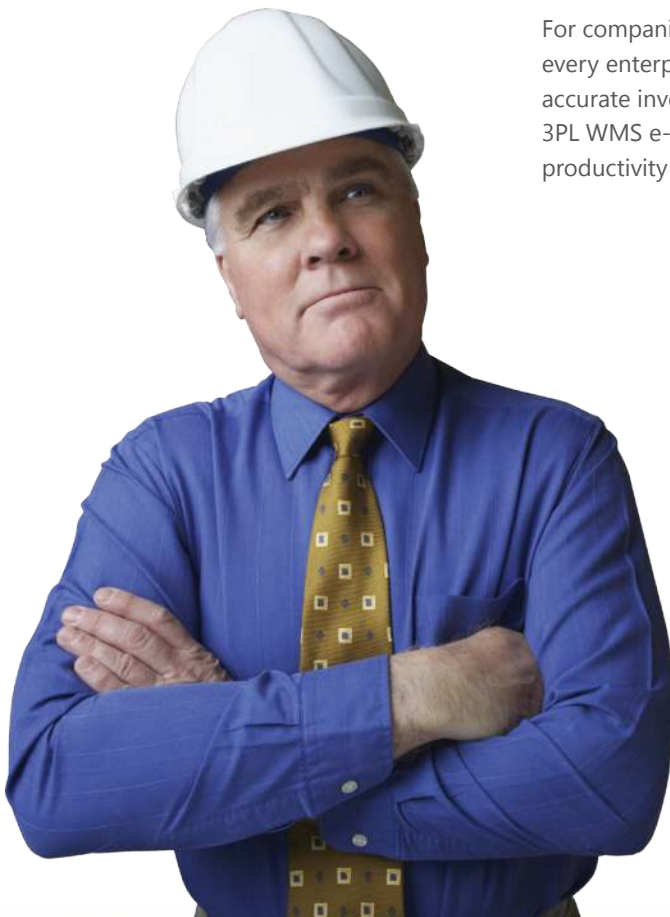

Datex FootPrint® 3PL Warehouse Management Software (WMS) developed from the ground up for third party logistics providers. The system provides complete warehouse management functionality including modules for billing, receiving, reporting, putaway, inventory management, picking, packing, and shipping. Datex FootPrint® 3PL WMS allows complete customization of the billing cycle. At the end of each cycle, billing automatically captures all of the operations and tasks performed. By providing a complete count of all the billable costs associated with each client, Datex FootPrint® 3PL WMS allows you to maximize profits and avoid lost billing opportunities.

> **"Our priority is to provide our customers with services that they deserve as fast as possible. Datex's FootPrint® 3PL WMS handles everything that we need."**
>
> **-Karen Reece, Eskimo Cold Storage**

For companies in the 3PL business, customer service is a key factor in the success of every enterprise. In this case, customer service translates into higher inventory visibility, accurate inventory, and faster order processing. When combined with Datex FootPrint® 3PL WMS e-Portal, your customers will receive access to all the visibility, efficiency, and productivity of the system through the use of Internet.

Features Available Separately
- ✔ Customer Web Access through e-Portal
- ✔ Work Order Processing and Management

Increase Customer Service & Satisfaction

Datex FootPrint® 3PL WMS allows companies to track any type of inventory including electronic equipment, apparel, pharmaceuticals, food and beverage, etc. with complete tracking of serial numbers, lot number, and expiration. Datex FootPrint® 3PL WMS comes equipped with several stock rotation systems such as FIFO, FMFO, or FEFO, among others.

Datex FootPrint® 3PL WMS gives you the flexibility to offer your customers multiple billing options to fit their specific needs. Each owner's inventory is completely separate from other inventory owners within the warehouse giving your customers the feeling of having their own warehousing facility.
