

Contract Manufacturers and Contract Packagers Software

Finally flexible, configurable software that helps contract manufacturers, contract packagers/co-packers manage operations and inventory for multiple customers and maintain the highest quality standards.

Using Datex FootPrint WMS will help contract manufacturers and co-packers streamline manufacturing operation, packaging capabilities and quality processes for greater accuracy and efficiency. Our web portal will provide 24/7 visibility of orders, shipments, invoices, reports and more to your contract packaging and contract manufacturing customers, all without the help of a customer service representative.

The Datex solution is rules based configurable software designed with maximum flexibility to enable your operation to meet the complex needs and billing requirements of many customers simultaneously across the supply chain and in a variety of industries.

From personal care, electronics, pharmaceuticals and medical devices to other types of products, our software can provide you with the functionality needed when dealing with packaging and manufacturing and inventory management challenges.

Benefit from much needed enhanced inventory control functionality, real time visibility across your enterprise and traceability for virtually any type of inventory, raw materials and finished goods. As a contract manufacturer or contract packager, 3rd party billing capabilities are essential to the profitability of your operation and are made easy with Datex software.

Manufacturing, Operations and Inventory Management Functionality:

- ✓ Manage multiple customer requirements simultaneously
- ✓ Facilitate inventory control for raw materials and finished goods
- ✓ Provide multi-level Bill of Materials
- ✓ Specifies production lines
- ✓ Enables batch scalability
- ✓ Tracks & balances raw materials & inventory during production
- ✓ Creates production orders
- ✓ Executes material transformation (from SKU to SKU, for example), ideal for packaging changes
- ✓ Automatic advancement of expiration date based on time out of optimal storage conditions (such as refrigeration)
- ✓ Link equipment to product type
- ✓ Executes kitting and assemble as well as dekitting
- ✓ Optimize inventory management processes
- ✓ Schedule, manage, monitor and track production and inventory
- ✓ Provide bidirectional tracking of:
 - o Lot
 - o Expiration date
 - o Serial number
- ✓ Execute product recalls
- ✓ Aid in facilitating regulatory compliance
- ✓ Streamline operational processes
- ✓ Improve data capture and provide real time visibility across the enterprise
- ✓ Kitting and assembly
- ✓ Comprehensive audit trail
- ✓ EDI and system integration available
- ✓ Document and file storage within the system
- ✓ For medical device and pharmaceutical contract packaging and manufacturing, validation services can be provided

Quality Assurance Features:

- ✓ Automate quality assurance/quality control processes for strict adherence
- ✓ Execute holds, quarantines, inspections
- ✓ Schedule quality assurance processes such as testing, visual inspection, etc.

Key Points

- ✓ Customizable out-of-the-box portal
- ✓ Automated customizable billing no matter the contract terms
- ✓ Capture & bill for all the value-added services you perform
- ✓ Easy 3rd party billing set-up wizard
- ✓ Real time data capture of critical data

Benefits

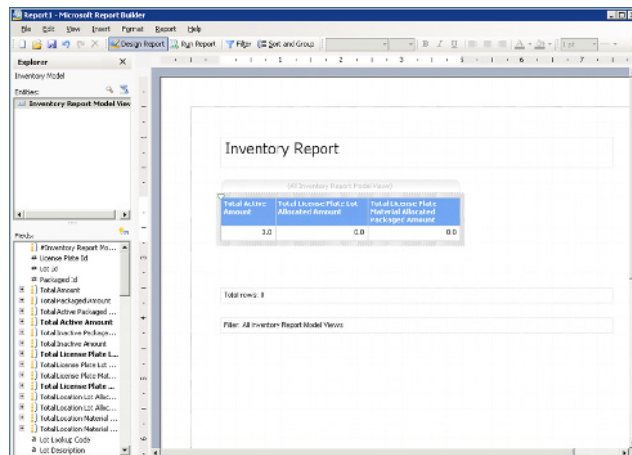

- ✓ Helps facilitate subcontractor, supplier & vendor management
- ✓ Provides visibility to and enables collaboration with customers, suppliers & vendors
- ✓ Helps ensure more accurate, efficient operational processes
- ✓ Helps facilitate regulatory compliance
- ✓ Helps reduce waste by tracking aging inventory & materials
- ✓ Helps improve speed to market
- ✓ Empowers you to have greater control over your operation
- ✓ Eliminates the need for error-prone paper-based records and manual processes

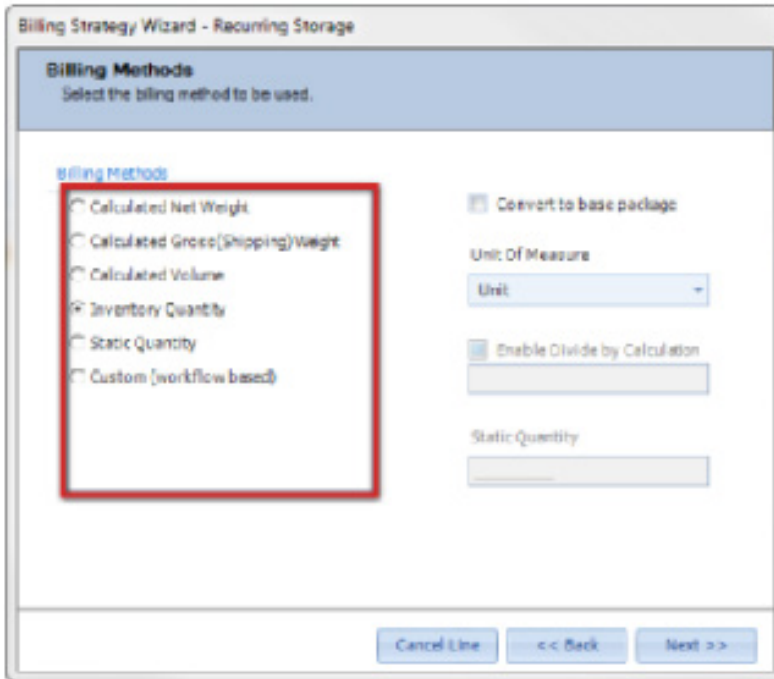

Reporting & Dashboards: Measure Performance and Monitor Profitability

Over 75 out-of-the-box reports are ready and waiting. Want a customized report? Use our configurable ad hoc reporting with drill down capabilities to get a true picture of your operations and ask Datex to do this for you.

Creating and using KPI dashboards provides your team with easy visualization tools to better understand factors that affect your profitability.

Powerful 3rd Party Billing System with Billing Wizard

- ✓ Easy-to-use billing wizard walks users through the process of setting up billing for each customer
- ✓ Workflow-based: billing is automatically processed based on the rules, decisions and factors you select for each individual customer
- ✓ Multi-level billing structures
- ✓ Capture and bill for accessorial charges
- ✓ Accessorial charges can vary by customer, product type, special handling or processing needs and be updated at any time
