

Supply Chain Solutions *Leader*

Datex is a leading developer of solutions designed to automate and streamline paper-based operations. Our focus is to provide our customers with the means to increase mobility, visibility, efficiency and productivity by implementing the latest in technology and equipment. Datex is a provider of complete turn-key solutions including software, hardware and professional services. Our company guides you through the entire process of analyzing your operations, developing an improvement plan, implementing your software/hardware, and providing complete training to maintaining a support plan that will ensure your company's continued success. We focus on markets where businesses require automation and mobility including 3PL, apparel and textile, electronics, manufacturing and distribution, food service distribution, and retail, among others.

“ We've been doing business with Datex Corporation for over 30 years and still counting. ”

Datex History

Founded in 1978, Datex has grown from a systems integrator dedicated to exploring new mobility technologies into a leader in the development of automated systems. Our team is comprised of over 100 professionals involved in software design and development, systems integration, sales, marketing, and training. By dedicating a large percentage of our resources to research and development, we stay on the leading edge of today's rapidly changing technology ensuring the utilization of the latest tools available to help our customers run smoothly and lower the cost of operations.

This year Datex is celebrating our 34th anniversary, demonstrating our commitment to providing our clients a solid and reliable business partner. As a company, we are committed to setting a high standard for excellence and pride ourselves on the level of personal attention and assistance we are able to offer our customers.
