

5 Reasons

Why this is a System Designed to Grow with Your Business

With **Datex FootPrint WMS**, your business has a system that is designed with maximum flexibility and a wide array of tools to handle different types of inventory from pharmaceuticals, food, apparel, electronics and precious metal storage to bulk goods and materials.

1 System Flexibility at Lower Cost

Most warehouse management systems are inflexible and rely on static hard coding that is costly to change. Datex FootPrint WMS relies on a flexible system of workflows, groups of activities joined by logic and decision making. Workflows are less costly and easier to change, saving your business time and money. Use workflows to change business processes, streamline efficiencies and onboard new clients faster. As your company grows, adding User Defined Fields (UDFs) and using workflows can ensure that our system can be configured to meet your business needs, easily and quickly. This will save your company time and costly professional fees and provide a competitive advantage.

2 Functionality to Grow On

Datex FootPrint WMS has all the basics plus so much more! With a WMS that includes top functionality, your business will be powered to run as efficiently as an enterprise and not have to buy new software as you grow your business

3 A System built to handle a wide range of Inventory

Whether your business services one industry or type of inventory or many, Datex FootPrint WMS can handle it, giving your company a competitive edge in today's crowded marketplace. The Datex warehouse management system currently is used across North America, Latin America and the Middle East to handle inventory such as food, pharmaceuticals and life sciences inventory, serialized goods, precious metals, electronics, apparel, bulk materials, and much more, some within the same facility!

4 Top Technology Always

Datex includes quarterly upgrades at no extra cost with maintenance and support agreements. This will ensure that your operation always has the latest, greatest most up to date technology without investing extra money.

5 System Options to Meet Your Growing Needs

Datex offers a variety of options for companies in every stage of growth. As an example, if your business desires to save capital, let Datex host your WMS solution. As your business grows, you can continue with a hosted solution or buy your own servers and move the solution on premise. Datex Software Solutions Consultants are always ready to discuss all the options we can provide to help with the solutions your business needs as changes need to be made.
