

Warehouse Management Software (WMS)

Warehouse Management *Software*

Datex FootPrint® WMS for Distributors

Datex FootPrint® WMS for Distributors provides the means for companies to have accurate real time information and streamlined business processes to power operations. Using state-of-the-art Microsoft technology, Datex FootPrint WMS enables your business to have the functionality found in top level WMS systems for a fraction of the cost. Developed to be highly flexible, the Datex warehouse management system includes a workflow engine that enables changes to business processes. This ensures that your business can customize business processes to meet your needs in less time and with less cost than other WMS systems. It allows your business to be more adaptable and responsive and can reduce implementation time.

Known for being user friendly, Datex FootPrint WMS for Distributors includes a suite of features designed to make users more productive, comfortable and efficient in their daily work. This includes customizable "drag and drop" reporting so that your software users can create reports based on their specifications.

Datex includes quarterly product upgrades as part of our support and maintenance agreement to ensure that your business always has leading edge technology and the latest functionality and features. This can save your company thousands of dollars annually and help ensure maximum business productivity.

“ We desperately needed a versatile warehouse management system to keep and expand our customer base. After considering several companies, we selected Datex, not only because they stay on the cutting edge of technology, but also because they want to build relationships with their customers. ”

- Mari Scott, Del Norte Distribution

Key Features for a More Powerful Distribution Operation
