

Meat Processing Industry Software

Using a combination of our clients' experience in the meat processing industry and our expertise in developing innovative solutions, Datex has created a new software module that combines increased visibility and tracking with flexible measurement and manufacturing processes. The result is a specialized manufacturing module perfect for the meat processing industry built from the ground up.

Quality Control and Lot Control

- ✔ Lot track and trace
- ✔ Lot track and trace by ingredient down to production line
- ✔ Tracks certification and compliance of finished product and ingredients
- ✔ Capable of placing products on multiple holds for testing, inspections and quarantine
- ✔ Lot product weight, production date expiration
- ✔ Categorization of finished product and ingredients

Why many consider Datex FootPrint to be among the very best:

- ✔ Flexible and scalable: state-of-the-art Microsoft .NET technology to create a highly flexible system that is easy to upgrade and scalable, perfect for the needs of dynamic businesses.
- ✔ Tier 1 functionality at a Tier 2 price: enjoy advanced functionality without the excessive expense
- ✔ Your report, your way: Non-technical users can create customized reports, saving businesses costly professional fees.
- ✔ Easy to use, learn and master: based on a familiar user interface, the look and “feel” of FootPrint immediately makes users feel comfortable and more confident
- ✔ US based customer support team: specializing in providing personalized attention to ensure the ongoing success of your business

Production

- ✔ Multiple units of measure
- ✔ Ability to track components and supplies throughout processing
- ✔ Ability to monitor labor, scraps and components
- ✔ RF functionality for finished products
- ✔ Catch weight management, including the ability to capture variable net and gross weight production variances
- ✔ Bar code parsing and the ability to generate embedded barcodes
- ✔ Bill for services rendered (production handling and storage)
- ✔ Can report on any data captured
- ✔ Capable of creating WIP (work in progress subassembly)
- ✔ Flexible ad hoc reporting capabilities using drag and drop
- ✔ Interfaces into scales, conveyor systems and fixed scanners

Why your business needs Datex FootPrint® WMS:

- ✔ Real time 24/7/365 manufacturing and warehouse information available for you to make critical business decisions
- ✔ Single system ensures business continuity, increases user adoption & decreases errors
- ✔ Detailed tracking of products, ingredients and more saves labor and time, helps ensure product freshness and facilitates product turnover and shipment
Workflow driven system increases business accuracy and customer satisfaction
- ✔ No costly updates; our updates are included with annual maintenance plans
- ✔ Highly skilled customer support team ensures that your business receives the time and attention it needs to make your business successful
