Mobile Device *Management*

We live in a nearly completely mobile world. The added convenience and access to real time communication and data does have a price: security and the need for constant oversight. Datex can help. An expert in mobile devices and business IT solutions, Datex can provide your organization with a customized plan of services to meet your budget and business needs.

It's a 24/7/365 world now

You need mobile devices in order to be able to always be in sync. Datex can monitor and troubleshoot your suite of mobile devices while in the field and can push software updates, manage security, troubleshoot devices and much more-all while the devices are in the hands of your workforce, not in our office. We'll keep you going, as you need it, when you need it. With a customized program of mobile device management (MDM), IT solutions and services, your organization will experience enhanced productivity, improved operational efficiency and minimized security risk. To ensure mobile device security, Datex can provide rapid deployment of security changes and access and handle immediate security lockdown of all or specific mobile devices. MDM data from mobile devices can be viewed via a web portal and reports can be generated.
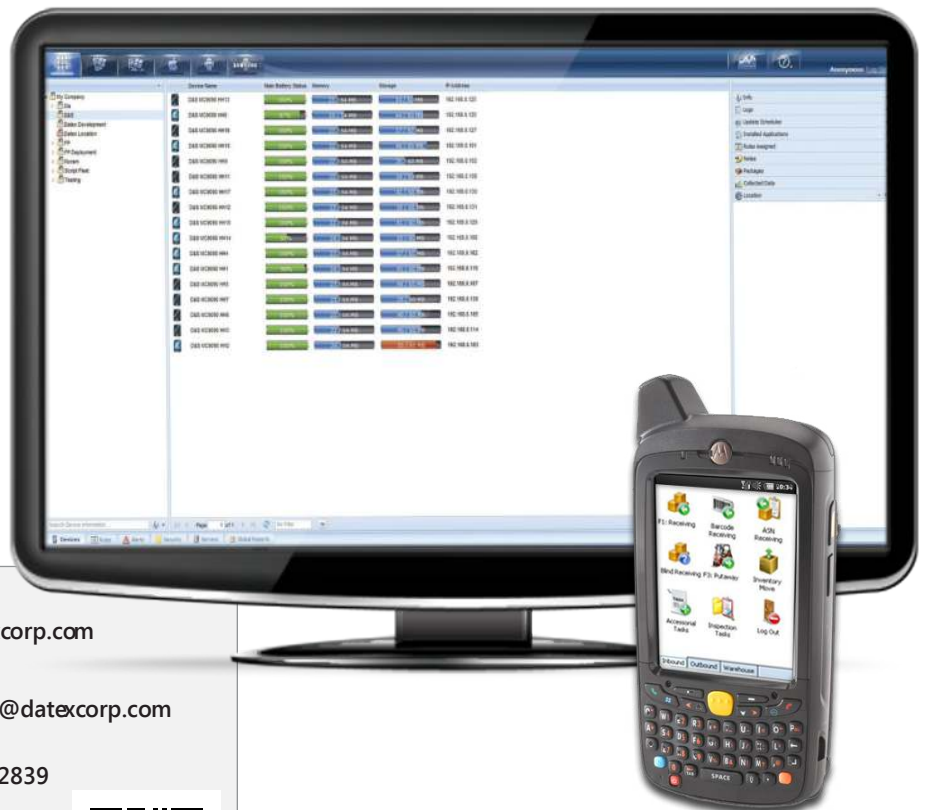

Microsoft® Partner
Gold Independent Software Vendor (ISV)

Features and Benefits:
