

FootPrint® PartnerLink™

Now your business can join forces with your warehouse or 3PL provider to focus on fulfilling your business needs. By both using FootPrint WMS for both your business and your provider's company, you can improve communications and operational efficiency, saving labor and time. Wouldn't it be great if both systems "spoke the same language"? Now they can... Your business relies on your 3PL to store and transport your inventory to customers. Every day, it takes a myriad of transactions to manage your product inventory. Using Datex FootPrint WMS for both 3PL and client enables streamlined communications, faster service with less duplication of effort and a reduction in errors.

Faster, smoother, easier operations

- ✔ Continuous visibility in both systems in near real time*
- ✔ Seamless business operations and communications
- ✔ Bi-directional orders, management and visibility
- ✔ Reduces frustration through clear, immediate communications
- ✔ Near real time accuracy of billing and inventory
- ✔ Allows for more immediate response from warehouse/3PL provider
- ✔ Can potentially reduce inventory time to market, handling and damages

Move beyond the Portal...

- ✔ Secure and private, using security roles and protocols you create
- ✔ Configurable for each individual business
- ✔ Removes the need for complicated integrations, costly interfaces and edi
- ✔ Provides secure, private access without the need for log ins and passwords
- ✔ Easy and cost effective to implement
- ✔ Requires lower initial investment and ongoing costs
- ✔ Available in on premise and SaaS models
