Shipping Management *Module*

If you are looking for the easiest, most cost effective way to handle shipping for your warehousing operation, look no further. As part of our integrated solutions package, Datex FootPrint® WMS Shipping Management Module can help lower shipping costs, improve accuracy and reduce manual labor costs. The Datex Shipping Management Module is an integrated shipping system that incorporates rate shopping functionality, documentation and reporting and allows users to manifest by day and carrier.

Integrated with the Datex warehouse management system, the Shipping Management module includes documents for UPS and FedEx and has the ability to produce documentation such as Bill of Lading (BOL) and labels. With multi-carrier and multi-modal capabilities, the Datex Shipping Management module allows users to compare and contrast accurate current shipping rates across multiple carriers, including LTL. Rate comparison is based upon specific information from within the Datex FootPrint WMS about the shipments under inquiry."
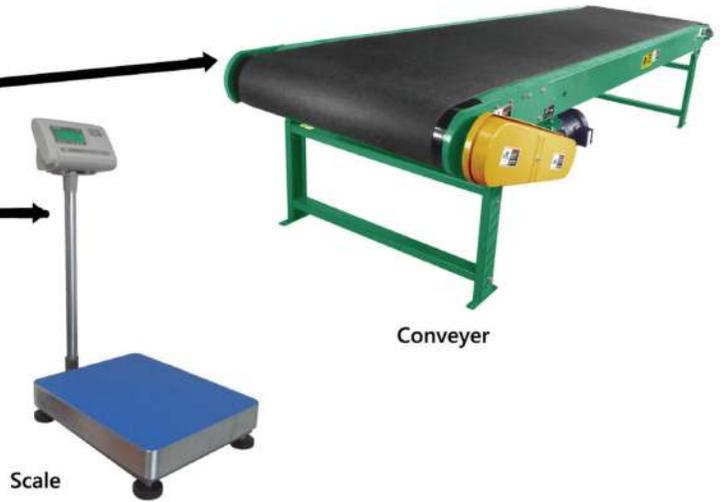

The integrated Shipping Management module for Datex FootPrint WMS reduces time, labor and errors by allowing users to bring in shipments from the warehouse management system directly, manifest from the carrier then prepare labels and documentation. Users can easily view all documents associated with shipments. The Datex FootPrint WMS Shipping Management module is designed to be connected to a scale and conveyor to ensure that users do not ship under/over weight packages.
