Footprint® WMS for Industrial

Engineered for Easy™

Simplify inventory complexities using advanced track and trace and inventory management capabilities. Enhance labor efficiency by reducing manual tasks. Empower industrial distributors to drive operational excellence and make better informed decisions with real-time data. Identify bottlenecks and optimize workflows to streamline operations and reduce costs. Tailor quality checks by customer, product line and SKU to reduce costs associated with returns, rework and warranty claims. Ensure your customers receive the highest quality products every time.

Optimize industrial distribution

Overcome inventory complexities and enhance labor efficiency with real-time order visibility.

Reduce costs associated with returns, rework, and warranty claims

Customize quality checks by customer, product line, and SKU to ensure customers receive the highest quality products.

Identify bottlenecks and optimize workflows to reduce costs and create smoother operations

Tailor services using insights from advanced analytics and improve customer satisfaction.

Overview of Capabilities

Quality Control

Document damaged goods with automated tracking and photos to prevent unwarranted claims and ensure accuracy. Inspect, hold, and quarantine goods using workflow-driven processes.

Labor Optimization

Tailor your user interface by role to improve focus and accuracy. Use workflow-driven processes to plan, schedule and monitor labor resources. Generate reports to gain insight for training and motivation.

Automate Regulatory Compliance

Comply with established SOPs and regulations by automating processes. Leverage our comprehensive, immutable audit trail for accurate, real-time data collection and documentation of operations.

Data Management

Simplify integrations; automate processes; removes bottlenecks and blind spots. Capture data via IoT, including environmental conditions of product to ensure product safety. Rely on nested serialization with aggregation.

Track & Trace

Track every step of a product's journey in real-time, from production to delivery. Manage product recalls accurately and in a timely manner.

Inventory Management

Accurate inventory tracking with centralized data and automated processes. Gain global view of inventory in real-time across your enterprise and third party facilities.

Who We Are

Datex is a warehouse management SaaS firm that serves operators in tightly controlled third-party logistics, food and beverage, life sciences and industrial industry segments.

Driven to make warehouse operations and growth as easy as possible, Datex is best known for its Footprint WMS platform: an intuitive, integrated cloud solution tailored to logistics providers and built to scale. Founded in 1978 and based in Florida, Datex today serves over 200 clients across the United States and other global markets.
